We remain committed to progressing on our vision of 'Becoming everyone's financial partner', thereby delivering greater long-term value to the company and shareholders," concluded Mr. Ye.

Use of Non-GAAP Financial Measures

The Company uses adjusted EBITDA and adjusted net (loss)/income, each a Non-GAAP financial measure, in evaluating its operating results and for financial and operational decision-making purposes.

The Company believes that adjusted EBITDA and adjusted net (loss)/income help identify underlying trends in its business that could otherwise be distorted by the effect of the expenses and gains that the Company include in (loss)/income from operations and net (loss)/income. The Company believes that adjusted EBITDA and adjusted net (loss)/income provide useful information about its operating results, enhance the overall understanding of its past performance and future prospects and allow for greater visibility with respect to key metrics used by its management in its financial and operational decision-making.

Adjusted EBITDA and adjusted net (loss)/income should not be considered in isolation or construed as alternatives to net (loss)/income or any other measure of performance or as indicators of the Company's operating performance. Investors are encouraged to review the historical Non-GAAP financial measures to the most directly comparable GAAP measures. Adjusted EBITDA and adjusted net (loss)/income presented here may not be comparable to similarly titled measures presented by other companies. Other companies may calculate similarly titled measures differently, limiting their usefulness as comparative measures to the Company's data. The Company encourages investors and others to review its financial information in its entirety and not rely on a single financial measure.

Adjusted EBITDA represents EBITDA before share-based compensation expenses, investment impairment loss, impairment of goodwill and intangible assets, investment gain of deconsolidation of subsidiaries and tax effects of above Non-GAAP adjustments. EBITDA represents net (loss)/income before interest, tax, depreciation and amortization.

Adjusted net (loss)/income represents net (loss)/income before share-based compensation expenses, investment impairment loss, impairment of goodwill and intangible assets, investment gain of deconsolidation of subsidiaries and tax effects of above Non-GAAP adjustments.

For more information on this Non-GAAP financial measure, please see the table captioned "Unaudited Reconciliations of GAAP and Non-GAAP results" set forth at the end of this press release.
